Products

http://george.millercodes.com/
> I built and currently maintain this website. (Built May 2015)

https://github.com/george-miller
> Python (with the Pygame framework) games I have built and my coding projects for university

Previous Employment

Intern at the start-up: Hostel.ly
> I worked as an intern doing project management, channel management, and development for a web based hostel reservations platform. During this internship I also attended NY Techday on April 23 2015 (Worked during the Spring 2015 semester and Summer 2015) (product: http://demo.hostel.ly)

Founding Vice President of Millercodes LLC
> I founded a company with my brothers to develop apps (4 members total) (Founded: January 2015)

Lifeguard at various Pools
> This was my main job throughout high school summers

Construction (Contractors Assistant)
> My father is a contractor and he employed me during summers and breaks when I wasn't lifeguarding

Tutoring
> I tutored many peers (including ZBT brothers) throughout high school and college in math and computer science

Skills

Languages (in order of preference)
> C, Python, Javascript (and jQuery), HTML, CSS, Java, PHP (and CodeIgniter)

Systems
> Windows, Mac, Linux – I use all three on a daily basis

Engines/Programs
> Unix style command line, Unity Game Engine, Photoshop, InDesign, Illustrator, git and svn
